

Today's consumers are becoming more sophisticated in the way they do business over the Internet. They want something that they can bite into. Something with substance, that won't leave them with a sour experience.

By providing a full assortment of services, such as custom website and application development, Internet marketing solutions, network administration and web hosting, **BIT Concepts** works with you to achieve the connections between your business and e-business.

Internet Functionality

We create your web presence.

We develop e-commerce web sites that:

- Function as an integral part of existing business, not as a separate entity.
- Foster brand recognition through extension to the web.
- Build corporate credibility through elegant design, high reliability and ease of use.

We create Custom Web Applications.

We specialize in creating custom web applications designed specifically for the needs of your business. These can assist you in simplifying existing tasks, as well as reducing costs. A few of our previous projects include:

- Image Galleries
- Home Gallery Listing System
- Technology Stores
- Sales Force Management Tools, Calendar-ing and Expense Reporting
- Materials Calculator

We do the Administration

We keep you up and running.

From web site maintenance to network installation to telephony integration, we have the experience and expertise to build, manage, maintain and upgrade your business.

We allow you to focus on your business.

We have the experience, knowledge and dedication to handle all of your Information Technology needs effectively, allowing you to focus on your core business and drive down your costs.

We make sure others can't shut you down.

Our staff has extensive experience in managing security for networks, servers, applications and desktops.

In all, we are experienced in transforming complex, technical challenges into realistic, affordable solutions

Full Service Internet

Shared and Advanced Web Hosting

At **BIT Concepts**, we offer a wide range of Windows-Based shared web hosting plans, from simple sites to SSL and SQL Server-enabled high-traffic sites. Our sites are monitored 24 hours a day to insure that they are operational.

Domain Registration

We offer full domain name recommendation and registration services. Let us assist you in securing your unique presence on the web.

Internet Marketing

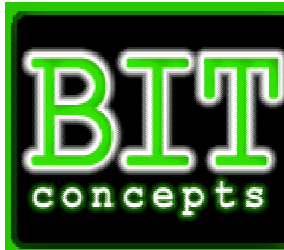

Creating a great web site is only part of the challenge. We work with you to drive customers to your site. Search Engine Optimization, Pay Per Click registrations, Affiliate Programs and Emails can all be part of an effective Internet presence. We will help you choose the right options for you.

Call On Us

We invite you to go online with us at **www.BIT-Concepts.com**, to see our interactive demonstrations, visit our client sites, and test our customized Internet business tools. Then call us to meet with our technical team to create a web presence that will connect your business with e-business.
